The reply must be filed within one of the following time periods:  $\square$  The period for reply expires  $\underline{3}$  months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). ## **Continuation Sheet (PTO-303)**

Continuation of 11 does not place the application in condition for allowance because:

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 8-9, 17-19 remain rejected under 35 U.S.C. 102(e) as being anticipated by Xu et al (US 2003/0143610) for the reasons of records on pages 11-12 of the office action mailed on 4/9/2006.

Applicants reiterate their arguments (page 2 of Response) that (i) Xu et al do not disclose what the sFRP peptide does or for what purpose one skill in the art could use the sFRP-5 peptide. Applicants argue that (ii) Xu et al teach modulating sFRP-5 (Xu et al call it SARP3), which is impossible to know whether to increase or decrease the sFRP-5 peptide activities.

Applicants' arguments have been fully considered but they are not persuasive for the reasons of record in the previous Advisory Action mailed on 3/5/2007.

Because Xu et al teach using SARP3 for treating SARP3 mediated metabolic diseases or disorders such as obesity, diabetes, overweight, insulin resistance, anorexia and cachexia, or for modulating lipogenesis and lypolysis in a subject (see abstract), they anticipate that the instantly claimed method. Applicants' arguments that the term "modulating" is impossible to know whether to increase or to decrease the polypeptide activity is fully considered but are not persuasive because, although Xu et al do not define the term modulate, Xu et al. do interpret the term "modulate" as either to stimulate or to inhibit (see- [0041]). Therefore, Xu et al anticipates the instantly claimed invention.
